

To Whom it may concern

I hereby endorse that Mr. Jay Naresh Dhanwant has worked with me on a non-supervised clustering machine learning project for a CRM application. He was able to understand complex business requirements and translate them to a simplified technical solution in a relatively very short amount of time. Jay was very proactive and responded to all my requests in a timely manner. He is well versed technically and demonstrates exceptional communication skills. He will make a great team member to any team and highly recommend him.
